MAOR IDI

SOFTWARE & DEVOPS ENGINEER

Tel Aviv, Israel | 052-5705588 | maoridi16@gmail.com
linkedin.com/in/maoridi | github.com/MaorIdi | maoridi.com

PROFILE

Software and infrastructure engineer with hands-on experience building Python automation, administering Linux and Windows environments, integrating APIs, and working with cloud-native DevOps tooling. Currently a QA Automation Engineer developing mobile and web test automation and CI/CD integrations. Completed military service and a 12-month DevOps Engineering program with high honors. Seeking DevOps, Backend, Platform, or Software Engineering roles focused on reliable automation, infrastructure, and software systems.

TECHNICAL SKILLS

DevOps & Cloud: AWS, Docker, Kubernetes (k3d), Helm, Terraform, OpenTofu
CI/CD & GitOps: GitHub Actions, Argo CD, Jenkins, Git, GHCR, CI/CD pipelines
Programming: Python, Bash, PowerShell, JavaScript, TypeScript, Node.js, SQL
Systems: Linux, Ubuntu, Windows Server, Active Directory, networking, Nginx, Cloudflare Tunnel
Backend & Data: REST APIs, FastAPI, PostgreSQL, MySQL
Automation & AI: Pytest, Selenium, Appium, Playwright, OOP/POM, LLM APIs, LangChain

EXPERIENCE

QA Automation Engineer | Quality-AI - Bank Hapoalim Project | **Aug 2025 - Present**

- Built a scalable Python/OOP automation architecture from scratch for native mobile and web applications and automated 200+ complex scenarios using Appium, Selenium, and REST APIs.
- Integrated automated suites into CI/CD workflows and built self-service execution for developers, enabling concurrent test runs on shared infrastructure.
- Built AI-assisted developer tooling with LLM APIs, including proxy and orchestration workflows for test automation.

Reserve Duty | IDF Air Force - Classified Operational Unit | **Mar 2024 - Mar 2025**

Freelance Infrastructure & Automation Engineer | Various Clients | **Feb 2022 - Mar 2024**

- Administered Ubuntu/Linux backend services on cloud-hosted servers, including deployments, SSH, networking, firewall rules, and service availability.
- Developed Python/Bash automation, monitoring, and logging scripts and integrated REST APIs between backend services.

Systems Administrator & Infrastructure Technician | IDF Air Force - Classified Operational Unit | **2019 - 2022**

- Served as a Team Leader in a classified operational unit.
- Administered Windows Server and Active Directory for 1,000+ users in a 24/7 high-availability environment.
- Built self-service IT automation and monitoring across 500+ endpoints.
- Supported RF, satellite, and VOIP/ROIP operational communications systems; completed military service with high honors.

DEVOPS PROJECTS

Yesh Avoda - Job Auto-Apply Web App | Personal Project, self-hosted, live at yeshavoda.co.il | **2026 - Present**

- Built a web app that finds job openings and applies to them automatically, using Python (FastAPI), PostgreSQL, and Playwright.
- Self-hosted it on my home Linux server in a Kubernetes cluster (k3d), with separate pods for the website, background workers, and database.
- Built a CI/CD pipeline with GitHub Actions that runs tests, builds the Docker image, and pushes it to GHCR.
- Deployed with Argo CD (GitOps): every change merged to Git is synced to the cluster automatically.
- Made it public with a Cloudflare Tunnel and Nginx Ingress, without opening ports on my home network.
- Set up autoscaling (HPA), nightly database backups with a CronJob, and 300+ Pytest tests.

End-to-End Cloud-Native Infrastructure Deployment | Independent / John Bryce Final Project

- Provisioned AWS infrastructure with Terraform.
- Containerized services with Docker and deployed workloads to Kubernetes.
- Built a Jenkins/Git CI/CD pipeline.

EDUCATION

John Bryce (Matrix) - DevOps Engineering Program | 605 hours / 12 months | Graduated with High Honors | **Mar 2025 - Mar 2026**
Holtz Air Force Technical School | Electronics & Computer Science

LANGUAGES

Hebrew: Native | **English:** Fluent
